Allowable Subject Matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance: Rappapor is directed to monitoring people's interaction with the communication to ensure that important communications are not lost. Moore is directed to a multipurpose internet mail extension content-type for delivery status notifications (DSNs). This is in contrast to the claim language which is directed to monitoring how the network the communication network are operating or whether a particular medical image is delayed while being transported across the communication network.

A thorough review of the prior art fails to specifically disclose, "receiving requests, by a medical image transport service from a client application, for transmission of medical images from data sources to data targets on the data communications network, the data sources including at least modalities, storage resources, and processing resources connected to the data communications network, the data targets including at least storage resources, processing resources, and viewing terminals connected to the data communications network, the client application providing a user interface to the medical image transport service through which users are able to submit the requests to the medical image transport service for transmission of the medical images from the data sources to the data targets; monitoring, by the medical image transport service, a--medical image network transactions between the a-data sources and e-data targets on the data communication network, said data communication network including a plurality of network elements interconnected by

Art Unit: 2454

communication links and configured to pass protocol data units between each other by utilizing the communication links, said medical image network transactions relating to the delivery of the medical images over a dynamically determined route on the data communication network as the medical images are transported by exchanging protocol data units between the network elements over the communication links as the medical images are transferred between the data source and data target within the data communication network”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chirag R Patel whose telephone number is (571)272-7966. The examiner can normally be reached on Monday to Friday from 8:00AM to 4:30PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph E.
